

Anonymity, The Deep Web and Cybercrime Workshop

Aim

The aim of this course is to provide Investigators and Analysts with an insight into how degrees of anonymity can be achieved by individuals, how the deep web is structured, how it works, its link to cybercrime and its implications on investigations.

Learning Objectives

On completion of the course, attendees will be able to:

- Explain the difference between the surface web, the deep web and the dark web.
- Describe how levels of anonymity can be achieved by individuals.
- Explain how the deep web can be accessed using specialised browsers and software.
- Explore the different types of criminality that exist on the dark web, including dark markets and understand the subsequent implications on operations and investigations, including forensic indicators.
- Identify and explain the different types of cryptocurrency and how transactions are completed.
- Highlight the origins of cybercrime and cyber-attacks from within deep web environments

Duration

2 days

Target Audience

This course is aimed at Analysts, Researchers and Investigators in all operational areas as well as private sector organisations.

Certification

All of our courses have been accredited under the Continuous Professional Development (CPD) Standards. CPD is the holistic commitment of professionals towards the enhancement of personal skills and proficiency throughout their careers.

Engaging in Continuing Professional Development ensures that both academic and practical qualifications do not become out-dated or obsolete; allowing individuals to continually 'up skill' and remain at the forefront of technology to ensure efficient and effective policing.
