

Effective Analysis of Communications Data Training

Aim

The aim of this course is to enable attendees to understand and interpret communications data and apply analysis that can be used in an operational context to provide insights that will aid effective decision making.

Learning Objectives

On completion of the course, attendees will be able to:

- Define the role of the analyst within an operational setting.
- Explain the processes and legislation that govern the acquisition and use of communications data.
- Interpret different types of communications data and be able to integrate them with other digital data, information, and evidence.
- Recognise current and new developments within the communications sector and identify the potential threats and opportunities that these developments pose to the investigative process.
- Aid investigation teams by utilising operational datasets to create analytical processes and products.
- Determine the role of the analyst in the courtroom, particularly in relation to the evidential use of communications data.

Duration

5 days

Target Audience

This course is specifically designed for law enforcement Analysts engaged within an operational role but it will also be useful for Researchers, Investigators or Analysts in other fields.

Certification

All of our courses have been accredited under the Continuous Professional Development (CPD) Standards. CPD is the holistic commitment of professionals towards the enhancement of personal skills and proficiency throughout their careers.

Engaging in Continuing Professional Development ensures that both academic and practical qualifications do not become out-dated or obsolete; allowing individuals to continually 'up skill' and remain at the forefront of technology to ensure efficient and effective policing.
