

# Chorus Investigator

## Immediate Insights

**A dashboard for Investigators to instantly see the who, what, where, and when of a case at the push of a button.**

Chorus Investigator is designed to help Investigators review the information available to them at a high level to help answer key questions and develop lines of enquiry, *fast*. We understand that time is critical in the early stages of an investigation, so Chorus Investigator is the latest edition to our industry leading data cleansing and analytics portfolio to help law enforcement in their fight against crime.

Where do they go?

Who is involved?

What happened?

When did this take place?

The dashboard is built around our integrated mapping functionality and the most popular reports as identified by UK police Investigators.

# Who, What, Where, and When

## Filters

Filters enable you to quickly select the data you want to see before visualising. Filter by:

- > **Date and time**
- > **Individuals**
- > **Phone numbers**
- > **Locations**

## Reports

Once the parameters have been set, a number of easy to read reports will display on the dashboard indentifying:

- > **Top locations**
- > **Most popular contacts**
- > **Call frequency**
- > **Activity of individuals**

## Mapping

Instantly see what happened around the time of an offence using the integrated mapping.

- > **Area filter**
- > **Colour coding**
- > **Editable labels**
- > **Snapshot exports**

Investigator map exports can be used evidentially.

## Immediate Answers

What happened around this date?  
Who are they communicating with? Where do they go?

With Chorus Investigator, maps and automated reports display answers at the push of a button. Pre-define reports and filter results to visualise exactly what you need.

## Data Loading and Cleansing

Chorus Investigator allows you to drag and drop your data into Chorus and take advantage of the cleansing capabilities used in the main Chorus software.

You can be assured your data is reliable and accurate before exploring lines of enquiry and instructing Analysts and Researchers to dig deeper.

Presented as a simple dashboard, Chorus Investigator takes the familiar Case Management screen that enables data loading via drag and drop and adds functionality in the form of immediate export options, such as communication and handset download profiles. Exporting all data to excel is possible, as well as automatic labelling and colouring of targets.

The Data Dashboard presents a case overview and brings together a number of reports and mapping capabilities to display key information at a high level. Filters and customisation options enable the Investigator to visualise the data exactly how they like it.
