Effective Analysis of Communications Data

5 DAY COURSE ✔ CPD Accredited

For Intelligence Analysts, Researchers & Investigators

This course helps participants to understand and interpret communications data and to conduct analysis in an operational context to provide insights that aid effective decision making.

This course is delivered by our accredited training partner, Cloudbreak Analysis.

CPD MEMBER
The CPD Certification Service
Collective Mark

Training Style

This course is composed of a series of informative lectures and an interactive communications data exercise which runs throughout the course. Training is delivered by a communications data expert with over 30 years of policing experience.

Prerequisites
None

Learning Outcomes

Define the role of the analyst within an operational setting

Aid investigation teams by utilising operational datasets to create analytical processes and products

Perform key assumption checks to enhance communication data analysis

Interpret different types of communications data and effectively integrate them with other digital data, information, and evidence

Know the processes and legislation that govern the acquisition and use of communications data

Define the role of the analyst in the courtroom, particularly in relation to the evidential use of communications data

Conduct pattern of life analysis using a range of datasets

Recognise current and new developments within the communications sector and identify the potential threats and opportunities that these developments pose to the investigative process
