Chorus Investigate

Answer the who, what, where and when to get answers, fast

An intuitive, self-service, data cleansing and analysis tool for Investigators and anyone looking to get insights from a case. Answer key investigation questions and open lines of enquiry, quickly and easily.

Reduce the reliance on skilled Analysts and data experts by empowering multiple disciplines to analyse all digital data and determine the who, what, where and when of a case, at the push of a button.

Get answers from your data in minutes

Ingest and search multiple data types including communications data, handset downloads and ANPR. Discover patterns and links instantly to reveal unknown connections.

Solve more crime with self service

Drag and drop data files in to a simple, easy to use dashboard for quick self-service analysis and report generation.

Complete data cleansing

Automated cleansing rules removes duplicates and associated noise from communications data. The rules also format data for consistency and validates locations and device information for accuracy.

Evidential reporting

Preconfigured reports can identify trends such as top locations, most popular contacts, call frequency and the activity of individuals.

Empowering multiple disciplines

Chorus Investigate empowers anyone wishing to easily present the facts of a case and generate intelligence and evidence, reducing the reliance and resource on skilled analysts and data experts.
