# The Chorus Intelligence Suite
Collect, develop, and disseminate data, all from one place.

A fully integrated suite to conduct every aspect of a digital investigation as efficiently as possible.

Made up of modular applications, the Intelligence Suite equips anyone involved in digital investigations with the tools to self-serve and confidently turn data into intelligence and evidence. Be empowered at every stage of the intelligence management cycle to realise the potential of your data.

Operational efficiency and improved decisions

Effective collection, development, and dissemination of data using the Intelligence Suite can bring a number of benefits to those tasked with keeping the public safe.

- Make massive efficiency gains across the organisation when searching for, and interrogating data.

- Bring all data together in one place for improved situational awareness and better decision making.

- Minimise human error and reduce the reputational risk of not securing justice.

- Present watertight and fully disclosed evidence to save court and legal costs by securing pleas.

Collection / Development / Dissemination

"It will be impossible for the police and prosecutors to achieve prompt and true justice without highly effective technological methods to acquire and analyse the large quantities of data now available in criminal cases."
Sir Thomas Winsor - Her Majesty's Chief Inspector of Constabulary - 2020 State of Policing

### Unparalleled functionality for digital intelligence and evidence

Drive complex, data rich investigations and present intelligence and evidence in a coherent, chronological, evidentially robust format that is easy to understand. A 21st century, improved service, for victims of crime that increases detection and enforcement rates and reduces reputational risk of unsolved crime, disclosure and public backlash.

Support of multiple disciplines

Reduce the reliance on finite experts and support multiple parts of an organisation involved in digital investigations to make informed decisions:

- Public contact call handlers

- Frontline officers

- Investigators

- Analysts

Chorus Intelligence Suite

Data collection

Connect to and search any data source anywhere, either internal or external to your organisation.

Conduct evidential open source capture of data, anywhere online and store it in a secure hub.

Data development

Combine, enrich, and query any digital data to get a complete view of people, objects, locations, or events (POLE).

Save time with automated cleansing and visualise data using maps, charts, and timelines to generate investigative leads.

Produce admissible reports at the click of a button.

Data dissemination

Store all intelligence and evidence in a collaborative workspace to easily share with partner organisations and the CPS.
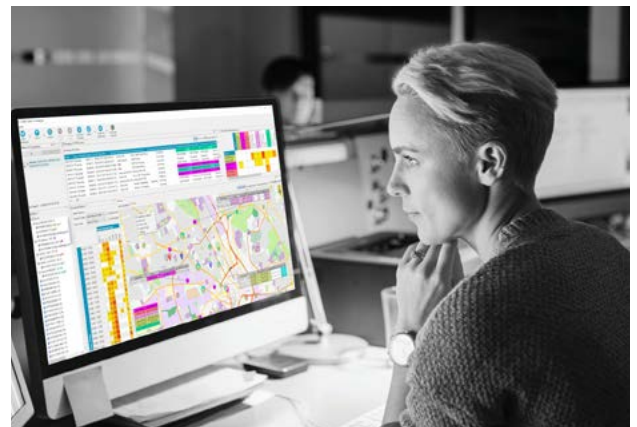

Audit access to manage information that complies with MOPI, IPA. and CPIA.

Provide frontline officers and victims and witnesses of crime with a discreet and secure portal to upload evidence.

Supporting the 2030 National Policing Digital Strategy

Chorus already has a reputation for delivering technology that makes a tangible difference to policing and protecting the public from harm. Our suite goes one step further and will enable law enforcement to meet the ambitions set out in the 2030 National Policing Digital Strategy.

✓ Seamless citizen experience

✓ Adressing harm

✓ Enabling officers and staff through digital

✓ Embedding a whole public system approach

✓ Empower the private sector

A trusted award-winning partner

Chorus is used by the majority of police forces in the UK and several major agencies including the Home Office and HMRC. The Intelligence Suite only requires a single business case and approval with a trusted vendor before benefits for the whole organisation and the public can be realised.
