

Chorus Secure Transfer

Secure, Encrypted File Transfer

Chorus Secure Transfer provides a safe and encrypted process for sharing large digital files, internal or external to an organisation, at the touch of a button.

Upload, download and transfer unlimited digital files of up to 5 terabytes via any device, over any network and from anywhere in the world.

Secure and encrypted digital file transfer

Save time, money and resource transporting important documents. Securely transfer unlimited digital files of up to 5 terabytes, internally and externally, at the touch of a button.

Define access levels for complete security

Set access levels to review and edit documents and send files only accessible by target recipients. Control who can download data and withdraw access instantly if required.

Ease of deployment

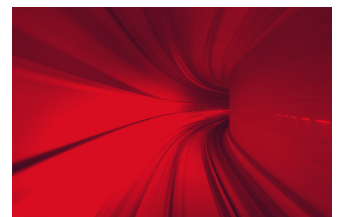

Capable of being instantly deployed in a safe, secure and compliant infrastructure with end-to-end encryption. Choose an open access cloud environment or host within an on-premise network, accessed using any web browser.

Robust audit trail to ensure compliance

Track who's received, accessed and read documentation. Recipients receive automatic reminders to download files and the data controller is notified once this is completed.

Effective collaboration platform

Individuals, departments and external organisations can use the intuitive dashboard to collaborate and discuss policies and reforms.
