# The Chorus Intelligence Suite

## Collect, develop, and disseminate data, all from one place.

**A fully integrated suite to conduct every aspect of a digital investigation as efficiently as possible.**

Made up of modular applications, the Intelligence Suite equips anyone involved in digital investigations with the tools to confidently turn data into intelligence and evidence.

The intuitive, self-serve dashboard, encompasses every stage of the intelligence management cycle, so you can effectively collect, develop and disseminate data, from one, central location.
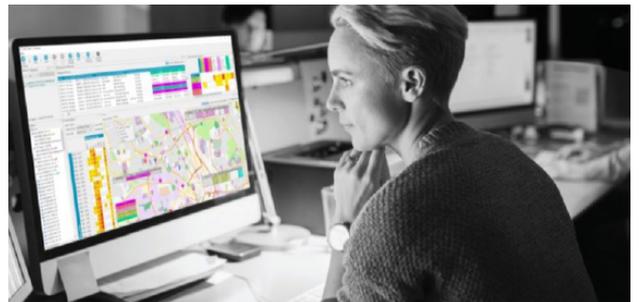

### Realise the full potential of your data

The Intelligence Suite will give you the edge by enabling you to:

- Securely search, combine and analyse any internal and open source data to develop intelligence on a subject of interest.

- Answer your key investigative questions, **fast.**

- Transform your analytical effectiveness and efficiency.

- Empower anyone involved with an investigation to use the intelligence suite's intuitive, self-serve interface.

- Deliver fully auditable results which can be shared with partners.

- Keep control of your sensitive data. Chorus delivers Software as a Service (SaaS) and has no access to and does not own any of your sensitive data.

**Search and capture any data, anywhere**

**Cleanse, combine and connect your data**

**Store all data in a secure and encrypted collaborative workspace**

## Data collection

Connect to, search, and capture any data from any intelligence source.

Seamlessly connect to public information, RMS's and other databases, or create bespoke connectors for any intelligence source required.

## Data development

Ingest and cleanse all forms of digital data to develop your intelligence picture.

Visualise, enrich and expand your data to explore unknown connections. Produce maps, charts and admissible reports at the click of a button.

Seamlessley integrate with i2® Analyst's Notebook for further indepth analysis.

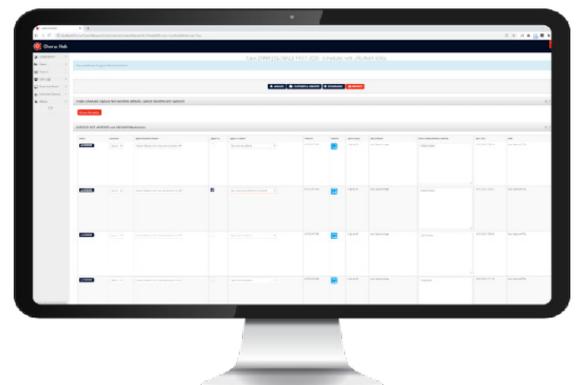

## Data dissemination

Store all intelligence and evidence in a collaborative workspace to easily share with colleagues and partner organisations.

Maintain a full audit trail of who has accessed what and when.

Link to any intelligence source, via a mobile device, to help your front-line personnel make quicker, informed decisions.
